

Aquaculture Pumps

HDPE MATERIAL

Polyethylene High Density

Pump Features:

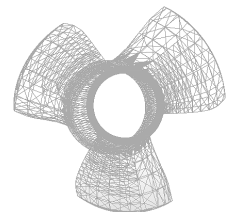

- The first real non-corrosive pump.
- Long life span to withstand prolonged usage in pumping warm tropical seawater.
- High efficiency with optimised propeller.
- Silent operation without metallic noise.
- Operation without any vibration.
- Available in vertical, horizontal, in-line and open designs.
- Service intervals are normally 5 or 10 years for pumps used fulltime in standard saltwater.

Pump Facts:

- 20 to 2500 l/s of flow
- 0,1 to 12 meter lift
- PEH pump body
- PEH pump casing
- Composite bolting
- Duplex shaft
- Special alloy propel
- Shaft seal can be avoided
- Rotation section as a unit
- Relative light weight

LM Pumps by Lykkegaard, Denmark:

The company was founded in 1883 based on the interest for mechanics. Managing Director Karsten Lykkegaard, now represents fourth generation of the family owned company. We offer pump solutions that will run 24 hours every day, year after year.
